

Carbon Reduction Plan

Cabinet Office

Supplier name: CleanEvent Service Limited

Publication date: May 2023

Commitment to achieving Net Zero

CleanEvent Services Limited achieved Net Zero emissions in 2022 through a programme of carbon offsetting and is committed to reducing our emissions further to achieve a carbon negative position.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021	
Additional Details relating to the Baseline Emissions calculations.	
CleanEvent Services Limited achieved carbon neutral status in December 2022 following a full assessment in Q3 / Q4 2022 to confirm our accreditation via Carbon Footprint Limited.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0.70
Scope 2	12.00
Scope 3 (Included Sources)	33.43
Total Emissions	46.12

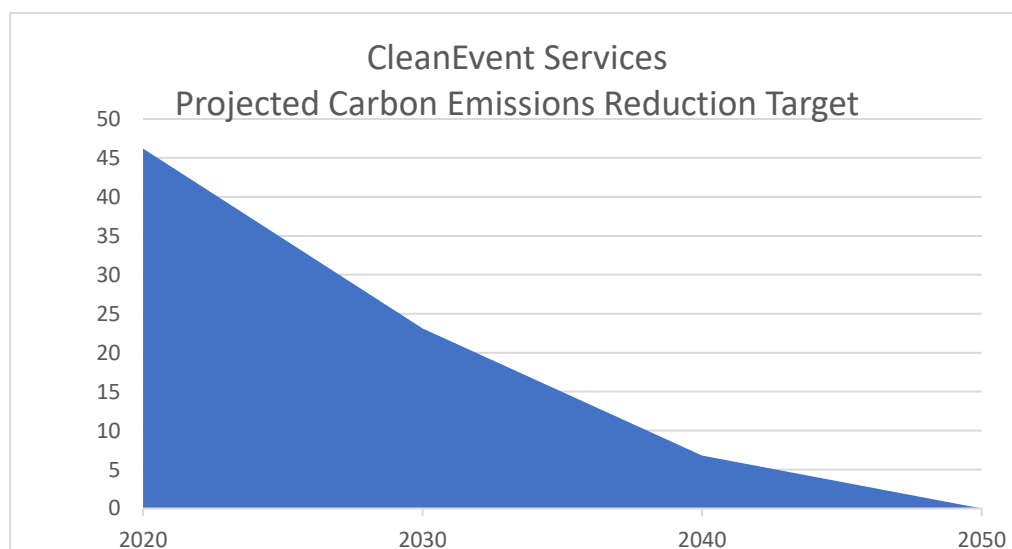

Current Emissions Reporting

Reporting Year: 2022	
It should be noted that the CleanEvent Services Limited emissions for 2022 shows an increase from 2021, during the trading year of 2022 the company has grown significantly through organic growth of over 50%.	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0.70
Scope 2	12.00
Scope 3 (Included Sources)	39.67
Total Emissions	52.37

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 38.23 tCO₂e by 2027. This is a reduction of 27%

Carbon Reduction Projects

The CleanEvent Environmental policy outlines the company's commitment to reducing our environmental impact through our business activities. This provides a framework for setting targets and measuring our performance in achieving these objectives, with our senior management team responsible for compliance to this policy. We hold accreditation for:

- ISO 9001
- ISO 4500
- ISO 14001

The following environmental management measures and projects have been completed or implemented since the 2021 baseline following our measures to reduce our emissions.

Electricity reduction

- We have adopted LED lighting at our Head Office.
- Environmental controls to reduce/mitigate the risk e.g., raise employee's awareness of the role they can play in switching off lights/equipment etc.

Company Travel

- We no longer use flights to our contract location in Inverness, we have now adopted the use of Rail.
- We use flights to our locations in Northern Ireland as a last resort. We have now adopted the use of Ferries to these locations as a default.
- All staff are encouraged to car share when attending company events.
- Overnight stays are widely used for onward travel as opposed to journeys back and forth.

Fleet

- All staff get a company car allowance instead of a company car and are incentivised to go with a Hybrid or electric vehicle.
- We are currently trialing the use of electric vehicles at our Anfield and Silverstone contracts.

In the future we are looking to implement further measures such as:

Supporting our Sustainability and CSR strategies we have developed a number of policies, these include:

- Waste Minimising Policy
- Sustainable Procurement Policy
- Buying Policy

CleanEvent Services has an established innovation forum who work with our key supply partners to identify and trial new products including recommendations for use within the business where tangible benefits are identified. The following are current examples:

Aerobic Digester – Accelerates the natural biodegradable process for food waste

Cup recycling scheme – Eliminate the use of single use plastic cups

Gloves and lanyards – Produced from recycled and biodegradable materials

Waterless urinals – Developed to reduce water usage

Paperless systems – Replacement of systems that traditionally relied on large amounts of paper, for example, recruitment and onboarding of staff

Electric vehicles – The introduction of electric vehicles

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Julian Kelly – Business Development Director
