

Sustainability Policy

CleanEvent Services Ltd is committed to developing our services to benefit people and the environment and we are committed to achieving the economic, ecological and social responsibility objectives of Sustainable Development.

Sustainable Development is a globally accepted approach to sustaining economic growth without harming our planet or exhausting its resources while improving the quality of life for its current and future inhabitants.

We believe that practicing Sustainable Development makes good business sense. In all our operations we consider each of these actions in making business decisions that demonstrate our commitment to the global Sustainable Development effort.

Economic responsibility dictates that we manage our business profitably to help drive economic growth and prosperity. We also believe that innovation is essential to achieving sustainable economic success and we continually seek ways to improve our services and our ecological performance. We will continue to monitor how our operations impact the environment and strive for continuous improvements.

The health and safety of our employees, neighbours, customers, and other stakeholders are paramount, as is our continued stewardship of the environment and the quality of our service.

This Sustainable Development approach will help to assure that we continue to demonstrate continual improvement in the Economic, Ecological and Social Responsibility pillars of Sustainable Development.
